摘要（原文节选）

Two efficient, scalable routes to bis-1,2,4-oxadiazole have been developed by tandem Staudinger/aza-Wittig reaction from the same starting material diaziglyoxime, isocyanates and triphenylphosphonium in good yields. Background: Two convenient and efficient routes for synthesizing diamino derivatives of bis-1,2,4-oxadiazoles were described. Objective: This study provides a simple protocol for the synthesis of bis-1,2,4-oxadiazoles. Methods: The two procedures were based on a tandem Staudinger/aza-Wittig reaction fro …

数据表 · Table 1（8 行，含数值行 8 行）

Preparation of diazioxalimides 2a-2h.

Product 2	R	Reaction Time (h)	Yield (%)[a]
2a	Ph	3	82
2b	4-CH3C6H4	3	77
2c	4-ClC6H4	3	71
2d	4-FC6H4	3	74
2e	3-ClC6H4	3	62
2f	4-BrC6H4	3	79
2g	4-NO2C6H4	3	81
2h	cyclohexyl	3	63
